

## FILTER BAG - POLYPROPYLENE / POLYESTER

### Advantages:

The FiltroUNO® PO filter bag is one of the most versatile and popular bags on the market.

- Made from a non inserted polypropylene felt with a glazed surface finish, the standard bag incorporates the welded seam design.
- The F Neck ring provides hermetic sealing, preventing steel ring bypass problems.
- The welded seam eliminates unfiltered liquid bypass occurring due to needle holes.
- The PE filter bag is made from non - inserted polyester, and can be ordered with the PE Neck ring.

The Bags come in a variety of sizes and ring seals\* to suit your vessel requirements

### Filter Dimension & Flow Rate

Filter Dimensions		Maximum Flow Rate For water @ 30°C
Size 1	7Ø x 16 in	18 m <sup>3</sup> /h - 300 LPM
Size 2	7Ø x 32 in	34 m <sup>3</sup> /h - 566 LPM
Size 3	4Ø x 8 in	5.7 m <sup>3</sup> /h - 95 LPM
Size 4	4Ø x 14 in	11.4 m <sup>3</sup> /h - 190 LPM
Maximum Operating Temperature		93°C (PO), 135°C (PE)
Suggested Maximum Differential Pressure		1.72 bar
