

MONO: Compact with high performance.

In spite of its compact dimensions, the newly-developed, MONO 6 SYSTEM blower continues to impress due to its high air volume of up to 600 l/min. One of its new features is the ability to adjust the air volume, either on the device itself, via the “e-drive” operating unit, or through the external interface. As a result, the blower can be adapted perfectly to suit every application. With its maintenance-free, brushless motor, the blower is ideal for continuous operation.
